Title: Ronson homes sales growth

Ronson homes sales growth

Developer Ronson Development sold 300 housing units in the first nine months of this year, 40% more than in the same period of 2010. "Gemini II is definitely the hit in our offer this year. Even before construction was launched, 40% of all apartments had been sold and now, a year before completion, only one-fifth of the units remain available," Andrzej Gutowski, sales and marketing director at Ronson Development, said in a statement.
